

Form-Based Codes 301

Preparing a Form-Based Code

Paul Crawford, FAICP, CNU
Crawford Multari & Clark Associates

Planning vs. Coding

A Comp Plan update should address urban design by:

- Defining “urban design boundaries” in addition to land use distinctions
- Describing the existing physical conditions and desired future conditions of each distinct place
- Describing City policy expectations for the desired character and quality of development in general, and in each sub-area

Planning vs. Coding

A Zoning Code update should address urban design by:

- Working out the details of urban design based on the policies and mapping in the General Plan
- Providing standards for development that will implement desired future physical conditions in each sub-area
- Configuring code standards and the development review process to make it easy for applicants to do what the City wants

Form-Based Code Concepts

- Rules for building form as important as land use regulation
- Emphasis on mixed-use and mixed housing types
- Greater attention to streetscape and design of public realm; and the role of individual buildings in shaping the public realm
- Standards for building form and mass consciously based on context and/or desired changes
- Design-focused public participation process and existing conditions analysis

Form-Based Code Standards

- FBCs include *most* conventional code standards
- Regulating Plan and zones maps intensity, form and character rather than simply land use
- Build-to lines may replace setbacks
- Frontage type requirements shape public realm
- Building type requirements relate buildings to the street and one another
- Street standards considered or revised when defining urban standards

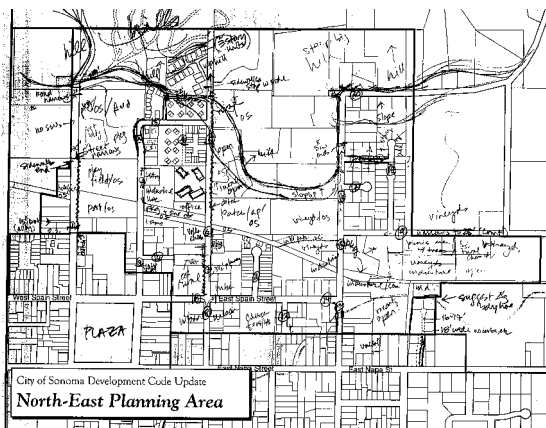

Preparing a Form-Based Code

1. Existing conditions analysis and inventory

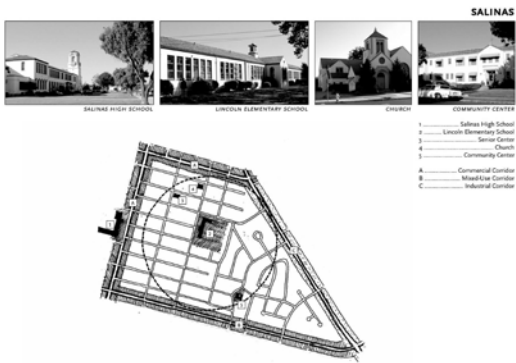

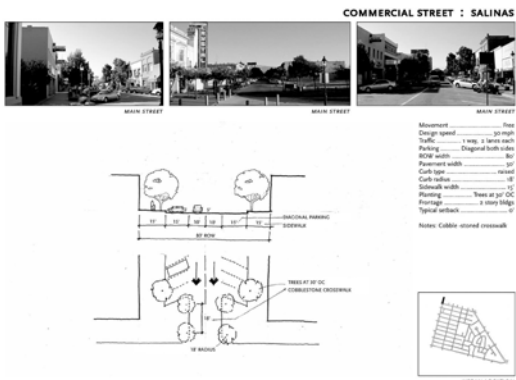

Planning Area Information Needs

Arrai NE

1. **Stream Types** the network will use compression and bandwidth
- o **Unicast** - one-to-one communication, RTT is low, the network is not congested, the sender is not sending to a large group of receivers
 - o **Multicast** - one-to-many, many-to-many, RTT is low, the network is not congested, the sender is not sending to a large group of receivers
 - o **Broadcast** - one-to-all, many-to-all, RTT is high, the network is congested, the sender is sending to a large group of receivers
2. **Flow Control** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
- o **Stop-and-Wait** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Sliding Window** - the sender can send multiple packets before waiting for an acknowledgment
3. **Buffer Management** - the sender must manage the buffers to avoid overflow and underflow
- o **Buffer Overflow** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Buffer Underflow** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
4. **Packet Scheduling** - the sender must schedule the packets to be sent over the network
- o **FIFO** - first-in, first-out, the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Priority** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Round Robin** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
5. **Packet Forwarding** (parallel, disjoint, load)
- o **Parallel** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Disjoint** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Load** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
6. **Network Features** (quality, throughput, cost, security, etc.)
- o **Quality** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Throughput** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Cost** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data
 - o **Security** - the sender must wait for the receiver to acknowledge the receipt of the data before sending more data

The Rural/Urban Transect

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

[illegible]

A grayscale map of a city grid with various land use zones labeled. The zones include: BARSTOWN, RES., PARK, ECONOMIC DEVELOPMENT, W. SHAWANA, BUSINESS PARK, OFFICE, MED-HIGH, INDUSTRIAL, RESIDENTIAL, and GETTYSBURG. A large white arrow points from the top left towards the bottom right, passing through several zones. A compass rose is in the top right corner.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Draft Regulating Plan and zones – Preferred Alternative

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Form-Based Zoning Prototypes Town Center (TC) Zone

Town Center (TC). The TC zone is applied to areas intended for the most urban conditions within the City outside of the Downtown. Buildings of up to four stories may accommodate a mixture of land uses emphasizing ground-floor retail with offices and residential above. Lodging, restaurant, entertainment, and civic uses are also encouraged. Street frontages throughout this zone are pedestrian-oriented, and defined by building facades at the back of the sidewalk, with all off-street parking provided in structures or located away from street frontages, behind buildings.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Form-Based Zoning Prototypes Neighborhood Center (NC) Zone

Neighborhood Center (NC). The NC zone is intended to establish a neighborhood focus that is distinguished by small-scale commercial and mixed-use buildings, together with courtyard housing and other residential buildings at higher densities than in the NG zone. Building heights are up to three stories. This zone will accommodate a variety of activities and services within easy walking distance from homes, supporting daily convenience shopping and personal service needs, and also providing opportunities for public gathering and social contact.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Form-Based Zoning Prototypes Corridor (COR) Zone

Corridor (COR). The COR zone is applied to major transportation corridors and their bordering properties. This zone is intended to accommodate regional transportation needs, and provide connections between neighborhood centers, town centers, and the greater community, in balance with the objective of defining pedestrian-oriented, mixed-use places. The COR zone also provides transitional areas between high traffic volume streets and single-family neighborhoods. Buildings of up to three stories accommodate offices, live/work, and upper-floor residential with appropriate noise protection.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Form-Based Zoning Prototypes Neighborhood General (NG) Zone

Neighborhood General (NG). The NG zone provides for a variety of residential building types and lot sizes, including detached one- and two-story single-family homes, duplexes, triplexes and fourplexes, sideyard housing, and bungalow courts, as well as parks.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

Form-Based Zoning Prototypes Neighborhood Edge (NE) Zone

Neighborhood Edge (NE). The NE zone provides for detached, larger one and two-story single-family homes on larger lots, as well as parks.

WEST SHAW URBAN DESIGN WORKSHOP – FRESNO, MAY 2005

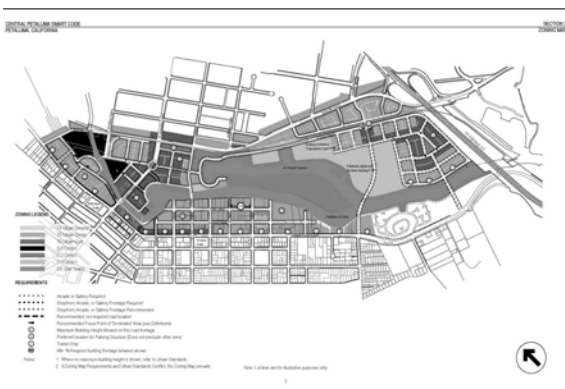

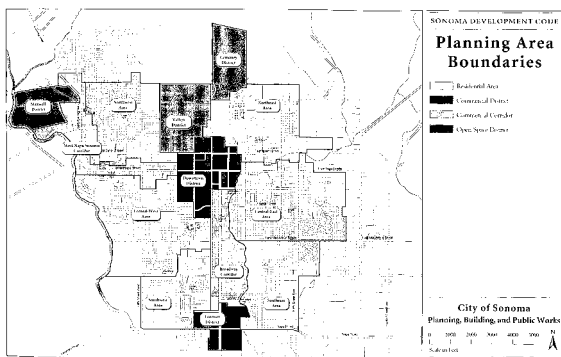

Overall Urban Design Plan

Draft Regulating Plan and Zones

Preparing a Form-Based Code

1. Existing conditions analysis and inventory
2. Public visioning/charrette
3. Regulating Plan and zones

Preparing a Form-Based Code

1. Existing conditions analysis and inventory
2. Public visioning/charrette
3. Regulating Plan and zones
4. Develop urban standards (streets, blocks, building placement, height, land uses, etc.)

Zoning Thematic Development Standards 17-20-200

F. Commercial Street. A Commercial Street provides access to, and space for commercial and mixed use buildings.

Commercial Street Design Standards	
Street Commercial Street width	60' to 80'
Overhead utility	40'
Traffic movement	Two-way
Traffic lane width	11'
Side lane width	4' to 12' on each side, when bike lane required
Design speed	25 mph
Parking	On-street both sides, 7.5' width, or designed as required
Intersection type allowed	T, X, round
Light type	Recessed
Light radius	25' to 30'
Median width	12' to 15' minimum, both sides, with buffer on at intersections and midblock driveway
Plaza area width	Minimum 10' width is required
Landscaped median width	12' to 15' required for pedestrian refuge on streets with more than 2 lanes
Landscaping	Shrubbery screen rows on both sides of street at 30' intervals, or trees screen tree walls

Article 3 - Design Standards

Adopted by Board - 10/15/10

ARTICLE 3 - URBAN STANDARDS

CHAPTER 3.01 - BOUNDARY DISTRICT

3.01.010 - EXISTING CONDITIONS AND DESIRED FUTURE

ALLEN AVENUE

Allen Avenue will be a right-of-way with minimum one lane of travel, with each direction. The design parking on the east side of the street is 10' wide and 10' deep. The design parking on the west side of the street is 10' wide and 10' deep. The design parking on the east side of the street is 10' wide and 10' deep. The design parking on the west side of the street is 10' wide and 10' deep.

SAK CAMPUS AVENUE

A 10' right-of-way will exist along Sak Campus Avenue. It may be used as a one-way street or as a two-way street. The design parking on the east side of the street is 10' wide and 10' deep. The design parking on the west side of the street is 10' wide and 10' deep.

FOOTBALL BOULEVARD

With a right-of-way of 100' Football Boulevard is the widest boulevard in the district. Each side will have two lanes of travel, a 10' wide and 10' deep parking area on the east side and a 10' wide and 10' deep parking area on the west side.

THE AVENUE OF THE CHURCHES

Between Sak Campus and Football Avenue, The Avenue of the Churches is a 10' wide and 10' deep parking area on the east side and a 10' wide and 10' deep parking area on the west side.

Urban Planning and Design
City of Houston

TABLE 11 - CB ZONE STANDARDS

Development Standard	CB Zone Requirement
Build-to-Rise: Required separation of primary structure from adjacent property line as shown in Figure 2-1. The building is set back from the property line.	10 ft.
Setbacks: Minimum setbacks required. See "Building Placement" and "Setbacks" sections. Minimum setbacks are required for all buildings.	10 ft.
Front:	Not built to rise.
Side (corner lots):	10 ft. during a residential zone, none otherwise.
Side (rear lots):	Not built to rise.
Rear:	10 ft. during a residential zone, none otherwise.
Building Footprint: Building footprint (area) shall not exceed the maximum allowed. Footprint area is defined as the area of the building footprint as shown in Figure 2-2.	
Allowed Building Uses:	Residential, commercial, industrial, and other uses as shown in the table.
Allowed Maximum Height:	None over 100 ft. or more.
Site Coverage: Maximum percentage of the area that can be covered by the building footprint.	100%.
Height Limit: Maximum allowable height of the structure.	100 ft.
Height Limit: Maximum allowable height of the structure.	100 ft.

The Trouble with Land Uses

- 19. Baths, Turkish
- 25. Boxing arena
- 28. Chinchillas, retail sales
- 41. Eleemosynary institutions
- 42. Embalming business
- 95. Physical culture institution
- 109. Potato chip manufacturing
- 127. Tombstones, retail sales
- 135. Turkish bath

Land Use Standards

Philosophical positions:

- Certain land uses and activities will always be inherently incompatible, will conflict with, and interfere with one another and, therefore, must be physically separated.
- Any land use or activity can harmoniously co-exist with another if their sites and buildings are properly designed.

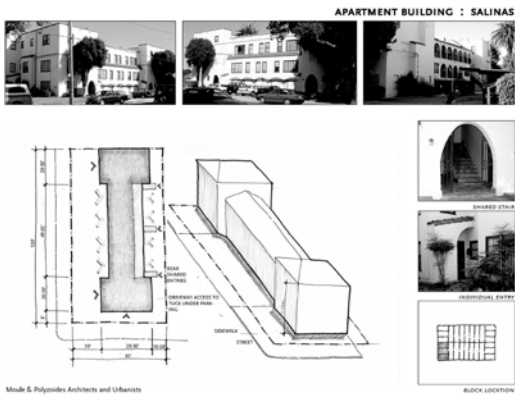

Defining Land Use Types

Alternative approaches to defining and regulating uses:

- Exhaustively list the universe of possibilities
- List generic use types with exceptions
- Just let go

- Agriculture, resource, open space
- Industry, manufacturing, processing, warehousing
- Lodging
- Recreation, education, public assembly
- Residential
- Retail trade
- Services – Business/professional, general
- Transportation, communications, infrastructure

- Operating between 9 pm and 7 am
- With alcoholic beverage sales
- With drive-through facilities
- Selling used merchandise
- With floor area over 50,000 sq.ft.
- With on-site production of items sold

Building Typology

- Single Dwelling
- Accessory Unit, Carriage House
- Duplex, Triplex, Fourplex
- Mansion Apartment
- Bungalow Court
- Rowhouse/Townhouse
- Sideyard Housing
- Live/Work
- Courtyard Housing
- Stacked Flats
- Commercial Building
- Flex/Mixed Use Building

ARCHITECTURAL TYPES

BUNGALOW COURT

Four or more detached houses arranged around a shared courtyard with pedestrian access to the building entrances from the courtyard access/entry street.

Each Bungalow Court should be designed to comply with the following standards, and the Bungalow Court requirements of this Code for the applicable zone, except where modified by this Section.

00877 Downtown Specific Plan

That's Medium Density Housing!

Photo Examples

The garage entrances are hidden from view of the street, and the entrances to each unit on the side of the building are articulated to read as a separate house. The street edge is defined with a gate.
